# CYGNUS FMD SYSTEM KEY FEATURES

The FMD system comprises three fundamental parts:

## **VERSATILE**

The FMD system is both diver or ROV deployable. Being of a compact design the probe is able to get into to hard to reach areas (e.g. K nodes) where other inspection methods cannot. A range of versatile options to suit working depths and varying requirements are available:

LIGHTWEIGHT ACETAL

CABLE PROTECTOR
PROVIDES EXTRA
CABLE PROTECTION
AND AN

#### **COST EFFECTIVE**

The Cygnus FMD System is owner operated and extremely easy to learn and understand. Due to its simplicity of use, the FMD system can be used by a range of operators, with varying experience, without the need for external contractors.

## **EASY TO USE**

The Cygnus FMD has an innovative probe handling solution which self aligns, ensuring correct contact with the member, even when approached from an angle.

The system also has a contact sensor which will not allow a test to be taken unless the probe is correctly aligned.

The system returns a simple DRY / FLOODED result to the reporting software with results logged at the surface.

#### **RUGGED**

Available in high grade acetal for the harshest environments. The FMD equipment is designed to the highest standards, supported by a three year warranty.

#### **RELIABLE**

Cygnus is an ultrasonic specialist. Years of industry experience and design expertise combine to make this system an extremely advanced, effective and reliable Ultrasonic FMD System available.

- The purpose-designed system boasts:
- advanced signal processing
- an advanced peak detection algorithm
- low distortion / low noise data acquisition to ensure highest level of confidence and to eliminate false readings.
- The system will only take a measurement when the contact sensor detects probe contact, ensuring reliable results every time. The reporting software will indicate at the surface should the probe lose contact during a test.
- System Test Function ensures the reliability of the system before it is deployed.

## **FMD REPORTING SOFTWARE**

- Used to perform system tests
- · Displays test results
- Displays A-Scans for verification
- Indicator shows RED if flooded, GREEN if dry
- · Logs results for offline analysis
- Reports can be generated and exported to PDF and Excel
